

HARO®
Quality Flooring

Engineered Hardwood Floor
Laminate Floor

Made in Germany

Company management in
the fourth and fifth generations:
Peter Hamberger and
Dr. Peter M. Hamberger

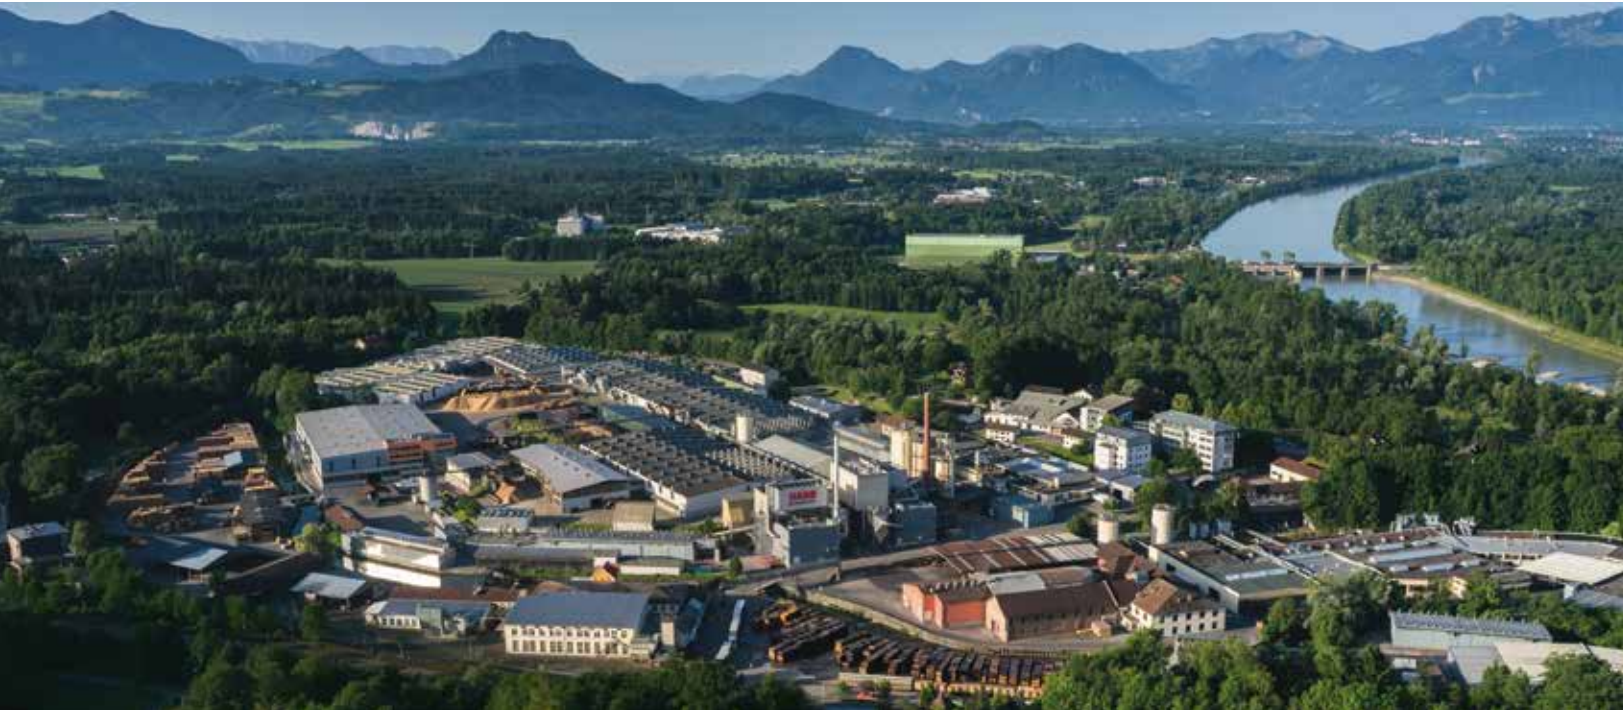

Welcome to HARO

The success of our brand is no coincidence. Our family business has a tradition in woodworking that goes back 150 years. We combine our love for wood as a natural product with a passion for continuous innovation when it comes to natural beauty and comfort. Our pioneering role when it comes to creating trends, our tireless striving for the highest quality and our consistently sustainable actions have made us Germany's leading Engineered Hardwood Floor manufacturer. In over 90 countries our brand stands for Engineered Hardwood Floor that fulfills the highest requirements – whether it is for Plank 1-Strip design, Longstrip or the new Plaza wide board.

Explore HARO's wide variety of products and be inspired by the most beautiful floors for your home.

The Company

1866-2016 **150** Years
HAMBERGER®

Our home for 150 years.

Wood – Liveliness and stability

It was a match factory and a sawmill with which Franz Paul Hamberger laid the foundation in 1866 for what is today's family-run company. Now, we can look back on 150 years of experience in the professional processing of wood. Our company principles have always included acting with the future in our sights and driving innovation. Already in 1950 we launched multilayer parquet as one of the first manufacturers and have since then developed it continuously. Today, our Engineered Hardwood Floors are renowned for their quality and natural appeal in over 90 countries. We acquire our raw materials exclusively from certified sources and focus on the responsible use of all resources needed for the production of our quality products. An Engineered Hardwood Floor by HARO is an investment in the most important part of your life: a healthy, stylish and beautiful home. This way, you create quality of life for each and every day. Welcome to HARO.

HARO Parquet

*Engineered Hardwood Floor
for sophisticated living – we call
it Parquet*

A parquet floor is the epitome of sophisticated interior design. We offer our parquet creations in three segments that meet every demand for sophisticated living. The entry-level Premium range impresses with its expressive oak varieties in the formats Plank 1-Strip and Longstrip. In the medium Exquisit range you will not only find expressive oak but also an elegant parquet oak sand white. The impressive large-scale format Plaza offers a top-class parquet experience in the Specialities segment.

www.blauer-engel.de/uz176

Facts about Parquet in short

There is more to HARO PARQUET than meets the eye. Many decades of experience, continuous improvement and innovative solutions always guarantee cutting-edge technology, the highest level of reliability and an extraordinary variety. On the next pages we will explain the benefits, various designs, grades and surface treatments to make it easier for you to choose from our product range. Also, we will illustrate the unique characteristics of our floors. This will make it easy for you to choose the perfect floor for your living situation.

DESIGNS

- 1. Longstrip:**
Clear and crisp look created by three parallel strips.
Dimension: 7 3/32" x 86 5/8"
- 2. Plank 1-Strip:**
The modern parquet classic in the plank design creates a spacious look.
Dimension: 7 3/32" x 86 5/8" or 6 13/16" x 86 5/8" (for Smoked Oak)
- 3. Plank 1-Strip Plaza:**
New, trendy board width for an impressive room ambience and a prestigious look.
Dimension: 9 7/16" x 86 5/8"

GRADES

The grading determines whether your parquet looks elegant and noble or powerful and natural. Choose between particularly harmonious or intentionally vibrant grades to accentuate your interior design style.

HARO PARQUET LONGSTRIP

- Favorit**
- Well-balanced combination of subtle and vibrant top layer strips
 - Look: appealing color variances, vibrant effect

- Trend**
- Natural wood grain with small knots
 - Look: natural, classic, timeless

HARO PARQUET PLANK 1-STRIP

- Alabama**
- Lively wood texture with an authentic amount of knots and a number of black puttied cracks
 - Look: individual, rustic, authentic

- Universal**
- Combination of our grades, including heartwood
 - Look: vibrant

- Markant**
- Wood grain with natural amount of knots
 - Look: natural, classic, timeless

- Sauvage**
- Natural to vibrant wood texture with a greater amount of knots
 - Cracks, filled spots and worm holes may be visible
 - Look: trendy, rustic

CONSTRUCTION

solid wood floors, multilayer parquet is also the better choice in terms of sustainability, eco-friendliness, and price-performance ratio.

- 1. Precious wood layer**, approx. thickness 3,5 mm (approx. 2,5 mm in the 2500 Series), made from carefully selected and dried wood
- 2. Middle layer** made of solid spruce fingerstrips with a consistent level of moisture, for maximum dimensional stability
- 3. Softwood backing board** for improved stability
- 4. Optional: Insulation layer** for increased comfort for your ears, joints and spine – either integrated or as a loose underlay

QUALITY IN ALL LAYERS

Solid wood floors, as we know them from earlier times, had some enormous drawbacks. Fluctuations in humidity can cause the wood to warp and uneven subfloors require time-consuming sanding prior to installation. In addition, a large amount of wood is needed to

produce a small area of flooring. Multilayer parquet from HARO easily solves these issues. The parquet's 3-layer construction with grains running in different directions reduces the natural swelling and shrinking of the wood by up to 70 %. And compared to

Our surface treatments maintain the natural appeal of your parquet floor. At the same time, they protect it from external influences

and preserve the radiance of your Parquet Floor in a natural way. This means you can adapt the parquet perfectly to your lifestyle

and enjoy your parquet floor for many years to come with only a minimum of maintenance required, depending on the wear and tear.

SURFACE FINISH

permaDur

HIGH FINISH

The hard-wearing finish
UV-cured acrylic resin

FOR ALL THOSE
looking for a particularly tough parquet floor that is also easy to maintain.

- CARE**
- Dry cleaning with broom or vacuum cleaner.

Laminate Floor

*The Laminate Floors from the
Parquet Specialist*

As Germany's leading parquet manufacturer, laminate flooring is another area in which we have been successful for many decades. By continuously improving and developing our products, we have succeeded in manufacturing laminate floors that are almost indistinguishable from real parquet. With patented technologies such as Silent CT noise insulation and the unrivaled robust surfaces, our laminate floors set new standards in terms of aesthetics, durability and healthy living comfort.

www.blauer-engel.de/uz176

Facts about Laminate Floors in short

Welcome to the variety of our Laminate Floor range: Here you will find just the laminate floor you are looking for. Our product range offers the choice between various natural wood styles, ranging from rich shades of precious wood to trendy, light colors. The intensity of each laminate floor's natural appeal is enhanced by expressive surface textures. The spacious Gran Via 4V format with its bevelled edges on four sides supports the interior design concept by making small rooms look larger.

IMPRESSIVE FORMATS

TRITTY 100 Gran Via 4V with bevelled edges all around: this is the spaciousness of modern and trendy Laminate Floors. The plank's width of 9 9/16" and its length of 86 5/8" make rooms appear significantly larger, creating generous areas with impressive visual impact.

SURFACES

AUTHENTIC VERSATILITY

The perfect wood reproduction for laminate floors is child's play for us – after all we are Germany's leading parquet manufacturer. Thanks to our experience in refining parquet surfaces we master an authentic appeal of natural and vivid wood styles better than any other company. We offer impressive possibilities for everyone looking for maximum authenticity. Our products range from smooth surfaces to sophisticated textures that are almost indistinguishable from real wood.

pores matt
Slight pore texture and natural matt look.

textured matt
Similar to real wood grain. The matt appearance underlines the natural look.

authentic
Almost indistinguishable from real wood. Texture and style match perfectly. The gloss level emphasises the character and the natural look of the wood reproduction.

Soft matt
Distinctive velvety soft surface. Natural and matt with a slight gloss effect in the texture.

Construction HARO TRITTY 100

BEAUTY OUTSIDE – QUALITY INSIDE

HARO Laminate Floor has been an ongoing success story for over 25 years. This is not only due to particularly authentic wood reproductions, but also because of the high quality and elaborate technical construction of our laminate floors.

1. Overlay with special impregnation (durable protective layer)
2. Decorative laminate with special impregnation
3. Special moisture control HDF-E1 coreboard aquaResist
4. Balancing laminate
5. Optionally available with integrated Silent Pro luxury insulation layer or with Silent CT technology (suitable for use with underfloor heating)

SYMBIOSIS OF BEAUTY AND RESILIENCE

Not only are our laminate floors extraordinarily beautiful – they are also highly resilient. This makes them just as suitable for highly frequented rooms as for installation in commercial areas such as offices (Abrasion class: AC4).

TRITTY 100

For residential applications with high traffic and commercial applications with medium traffic

Insulation underlays

INSULATION UNDERLAYS

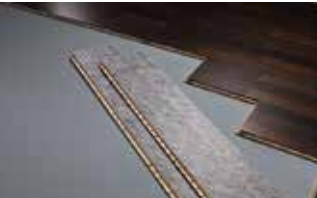

SILENT PRO INSULATION LAYER

Our insulation layers offer excellent insulation of footfall and room sound. They are equally suitable for installation under parquet and laminate floors. The high elasticity provided by the mineral fillers creates a pleasant “forest floor effect”.

Silent Pro:
Based on PUR with mineral fillers.
Thickness: approx. 1/8”
Footfall sound reduction: 19 db
Room sound improvement: 30 %

INTEGRATED INSULATION LAYERS

We particularly recommend the integrated insulation layer on the back of the board (available for areas over 10 sqm). Due to the fixed connection between parquet board and insulation, an impairment of the insulating effect due to cavities or gaps is avoided. Another advantage: Installation and insulation are done in one single work step.

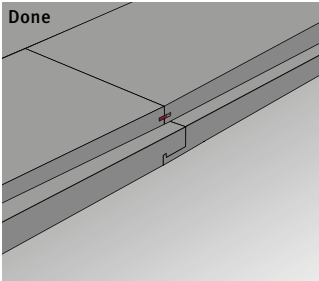

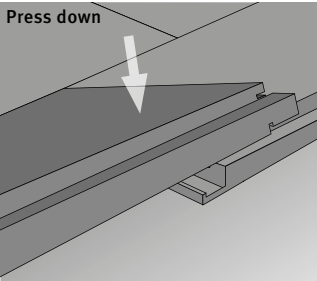

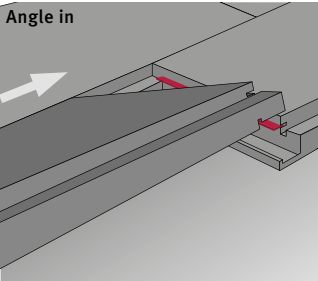

LOOSE INSULATION UNDERLAYS

An insulation underlay is generally recommended for all hard subfloors. It increases the floor's resilience, absorbs indoor and footfall sound, and evens out minor irregularities of the subfloor.

Installation

INSTALLATION SYSTEM

TOP RESULTS WITH TOP CONNECT

Professional installation for everyone – easier and quicker than ever. Top Connect is probably the world's easiest installation system: it can be installed entirely without tools

You can install your HARO quality floor in no time – if you move house, you can take it out again just as easily.

- Very quick to install
- High-precision system for professional results
- Easy to put in, easy to take out
- Secure connections at the side and end joints
- Suitable for glue-down installation

UNDERFLOOR HEATING

Our Floors are not only suitable for installation over underfloor heating, they are actually ideal for it. The technical construction of our floors ensures that warmth can easily get through. This way, you can save heating costs and enjoy a pleasantly regulated underfoot warmth during the heating period.

CARE AND PROTECTION
A CLEAN SYSTEM

For the sustainable care of HARO PARQUET and HARO Laminate Floors we have developed the innovative care series clean & green. It makes it easier than ever to clean and maintain our floors and is completely safe and environmentally friendly.

clean & green®
Quick, easy and natural maintenance of all floors

- Parquet Cleaner 'natural'**
Eco floor care concentrate
For regular cleaning of all parquet surfaces.
- Intensive Cleaner 'active'**
Eco floor cleaner concentrate.
For the basic cleaning of parquet.
- Parquet Care 'aqua oil'**
Special care product for oiled surfaces.
- Floor care aqua shield**
Durable refurbishing and maintenance of prefinished parquet.

Quality Made in Germany Certifications

When you choose a quality floor by HARO, you are making an excellent choice in many ways. As a renowned parquet manufacturer we create particularly natural and authentic styles. After all, it is our expertise when it comes to real wood that we bring into play. Moreover, our Laminate Floors are made of 90% wood, which ensures a natural and healthy living environment. In addition, our production processes guarantee many years of quality living at the highest standard – we

leave nothing to chance when it comes to quality. Our experienced employees monitor product quality at every step of the manufacturing process. Above all, it is the durability of these high-tech floors that makes them so special. Despite the look and the texture, which are almost indistinguishable from real wood, our Laminate Floors are characterized by extreme durability and stability. For your home this means that you can rely on your floor in every respect.

Sustainability
Hamberger Flooring GmbH & Co. KG has been PEFC-certified since the beginning of 2004. This guarantees that the wood we use is sourced from sustainably managed forests.

Real wood
Hamberger Flooring GmbH & Co. KG leads the way in implementing the Real Wood Campaign to ensure real wood floors are correctly identified as such.

ISO 9001
Our quality management system has been certified in accordance with DIN EN ISO 9001:2000 since 1995. It secures workflows in the company and consequently contributes to maintaining a consistent product quality.

ISO 14001
With the certification according to DIN EN ISO 14001:2004, we have committed ourselves to active environmental management since 1998.

ISO 50001
The ISO 50001 standard is aimed at supporting companies in establishing processes and systems necessary to reduce their energy consumption and increase energy efficiency.

Made in Germany
Because our top quality floors are of the proverbial German high-precision workmanship, they come with the internationally renowned “Made in Germany” label.

CE
The CE label confirms that HARO floor coverings comply with all essential European safety and health directives.

Blue Angel eco label
The Blue Angel has proven the environmental compatibility of our products since 1992.

www.blauer-engel.de/uz176

HARO: Versatility is our hallmark

Our passion for wood has made us Germany's leading parquet manufacturer. In addition to our classics in the Parquet and Laminate Floor ranges, we offer particularly elegant two-layer Parquet Floors, trendy DISANO Design Floors and natural Cork Floors that are gentle on the joints. Thanks to this variety, you have the choice between premium floors for your home that leave no wish unfulfilled.

Two-layer parquet floors consist of a substructure made of spruce wood and a top layer of precious wood. The advantage of these noble parquet floors is the flexibility when it comes to their installation. This allows the professional installers to realize classic laying patterns, such as full-surface glue-down installation in a herringbone pattern.

HARO PARKETT ProNamic
The intelligent parquet floor for active people

With its highly elastic, energy-absorbing, noise-absorbing and non-slip properties, ProNamic is the ideal parquet floor for all sports facilities – from private hobby rooms to gyms and public buildings. This unique natural wood floor optimally supports sports activities while creating stylish visual highlights.

DISANO by HARO

The design floor for healthy living.

100 % free from PVC and plasticisers

DISANO Design Floors by HARO are entirely free from plasticisers, PVC and phthalates. This is one of their unbeatable advantages to conventional PVC flooring – which is sold under the name vinyl flooring – that contains harmful plasticisers. Our philosophy concerning healthy living is incompatible with the use of these substances that pose a threat to our health. This is why DISANO Design Floors by HARO are certified with the Blue Angel and the Eco Label. Our floors guarantee a healthy home – including the bathroom, kitchen, and any other damp rooms.

DISANO by HARO

Series:

Comfort throughout the home

More and more interior designers rely on the simplicity of DISANO Design Floors. They are incomparably soft and warm when walked on, extremely durable, highly resistant, and completely free from any pollutants. They guarantee a healthy living atmosphere and inspire with their authentic styles and formats.

100 % FREE
from PVC and
plasticisers

DISANO Saphir

The durable and waterproof 4.5 mm-thick full-plastic design floor with waterproof coreboard.

DISANO SmartAqua

The smart design floor with a construction height of 6.5 mm and moisture-control coreboard for carefree living – even in damp rooms.

DISANO Project

The waterproof design floor for professional installation and renovation with a construction height of only 2 mm.

DISANO by HARO

The right format for every room

To make a room really impressive, you need the right board format. With the Design Floor DISANO by HARO, you have the choice of six different formats: From extra long for a spacious room impression in living rooms, to the classic board format for smaller areas like bathrooms. Even an appealing alternative to tiles can be found in the DISANO range - waterproof or with moisture protection.

■ Dimensions: 12 7/32" x 25 19/32"

DISANO by HARO

The difference: Superior in every way

DISANO Design Floors by HARO have decisive benefits over conventional PVC floors that contain plasticisers: they are not only better when it comes to creating a healthy living environment, they are also so superior due to their technical advantages and properties of use. In addition to discolouration, embrittlement, and cold flow, DISANO by HARO Design Floors are characterised by a structure that has a particularly high level of dimensional stability. Here, the rigid coreboard plays a decisive role (with the exception of the DISANO Project). This makes the DISANO by HARO Design Floor particularly resistant to temperature changes and makes it especially easy and quick to install – even if the subfloor is slightly uneven.

Standard vinyl floor

DISANO by HARO

COLOUR CHANGES
The colours of vinyl floors can change significantly under the influence of UV light. DISANO by HARO keeps its colour throughout its entire lifetime.

Standard vinyl floor

DISANO by HARO

DIMENSIONAL STABILITY
Vinyl floors react to warmth, e.g. through exposure to sunlight, by bending. DISANO by HARO, on the other hand, remains even due to the rigid core board.

Standard vinyl floor

DISANO by HARO

COLD FLOW
Cold flow is the phenomenon in which furniture and chair legs cause permanent dents in vinyl flooring. DISANO by HARO, by contrast, is pressure-resistant and these dents never occur.

Standard vinyl floor

DISANO by HARO

EMBRITTLING
The plasticisers in vinyl floors lose their effectiveness in the course of time. This can cause the floors to become stiff and brittle.

Standard vinyl floor

DISANO by HARO

DISPOSAL
Vinyl floors (e.g. residues or trimmings after installation) must not be disposed of as household waste. DISANO by HARO can be disposed of in household waste without worries.

DISANO Saphir
Plank 1-Strip 4VM
WILD OAK
textured
(wood reproduction)

Waterproof

DISANO SAPHIR AND DISANO PROJECT

- Approved for installation in bathrooms, kitchens and other damp rooms.
- Extremely hard-wearing thanks to the waterproof full-plastic construction (DISANO Saphir with rigid coreboard, DISANO Project with ElastoTec layer)
- Low profile
- Ideal for renovations
- Harmonises perfectly with any kind of underfloor heating or underfloor cooling.

Moisture protection

DISANO CLASSIC AQUA AND SMARTAQUA
